--	---

Application/Control Number: 10/614,030 Page 2

Art Unit: 3754

Specification

1. The disclosure is objected to because of the following informalities: in the amendments to the specification, it appears that the amendment to page 3 should actually be for page 2.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Desrosiers et al.

Desrosiers et al. shows a body 11; opening at 15; tank 14; tank opening 13; taps 71, 71'; pipes 63, 74; seat 12; latching device 51-55 as seen in Figure 1A; sealing member 12 seals the tank as seen in Figures 1A and 4; upper and lower chambers 14' and 14"; partitioning board 60; water outlet apertures 62, 65; outlet pipe 63; outlet aperture 65; outlet port 75; cooler 72; insulating material 73; U-shaped seat 30; water inlet and venting pipe 16; inlet aperture 40; pipe 46; contact surface seen in Figure 1A; L-shaped latching part 51-54 seen in Figure 1A; air inlet port 84; ring 53 and clip socket that receives 15 as seen in Figure 1A. Desrosiers et al. lacks the multiple latching members. It would have been obvious to one of ordinary skill in the art to provide multiple latching devices with apertures instead of one large device as it would reduce

the amount of material needed for the latching device which would save material cost and would also allow for failure of one of the connections while still permitting adequate latching.

4. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Desrosiers et al. in view of Burrows '961.

Desrosiers et al. has been discussed above, but lacks the valve arrangement for the vent. Burrows shows a one-way float valve 92 discussed in column 6, lines 4-12 for venting the tank. It would have been obvious to one of ordinary skill in the art to provide a one-way float valve as taught by Burrows on the device of Desrosiers et al. in order to prevent water from escaping through the venting device.

Response to Arguments

5. Applicant's arguments filed 6/27/2005 have been fully considered but they are not persuasive. Applicant contends that the sealing member of the applicant's device is different from that of Derosiers. Applicant specifically points to the drawings to illustrate the differences. However, as the claimed limitations are met, comparing the drawings is not germane.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3754

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Kaufman whose telephone number is (571) 272-4928. The examiner can normally be reached on Monday-Thursday, 5:30AM-2PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Mar can be reached on (571) 272-4906. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
